Education

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, India

Bachelor of Technology in Computer Science Engineering

July 2022 – June 2026

CGPA: 7.17 / 10

Govt. Excellence Higher Secondary School, Ujjain (MP Board)

Higher Secondary Education (Class XII)

May 2021 – March 2022

Percentage: 68%

Govt. Excellence Higher Secondary School, Ujjain (MP Board)

Secondary Education (Class X)

June 2019 – March 2020

Percentage: 78%

Projects

Sadak-Saathi — Full-Stack Web Application

React.js, Node.js, MySQL, Google Maps API

- Developed a full-stack web application enabling citizens to report location-based road issues with image support, improving complaint tracking efficiency and reducing manual reporting effort.
- Built a responsive frontend using React.js and designed RESTful APIs with Node.js for seamless data flow.
- Integrated MySQL database to manage users, complaints, and real-time status updates efficiently.
- Implemented geo-tagging using Google Maps API for accurate complaint location tracking.
- Designed an admin dashboard to monitor, update, and resolve complaints, streamlining authority workflows.
- Implemented role-based access control for secure separation of citizen and admin functionalities.

EDtech-StudyNotion — Full-Stack EdTech Platform

React.js, Node.js, MongoDB, Razorpay

- Developed a full-stack EdTech platform enabling users to access and manage digital learning content efficiently.
- Implemented secure authentication and role-based access control (Student, Instructor, Admin) using JWT.
- Designed and developed RESTful APIs for course management, user operations, and progress tracking.
- Integrated Razorpay payment gateway for secure and seamless course transactions.
- Built a responsive UI using React.js and Tailwind CSS, improving user experience and accessibility.

IoT-Based RADAR System

Arduino (UNO), Ultrasonic Sensor, Servo Motor, C/C++

- Developed a real-time object detection system using ultrasonic sensors and Arduino.
- Implemented a 180-degree scanning mechanism using servo motor control logic.
- Processed sensor data to calculate object distance using ultrasonic echo timing.
- Visualized object detection output for better monitoring and analysis.

Technical Skills

Languages: Java (**Core Java**, **OOPs**), JavaScript, **SQL**

Web Technologies: React.js, **Node.js**, HTML, CSS

Database: **MySQL**, MongoDB

Tools: Git, GitHub

Soft Skills: Team Collaboration, Leadership, Adaptability

Achievements

- NPTEL Certifications (3 courses, 2024)
- IBM Cloud Computing Virtual Internship (2026)
- Java + DSA (Apna College, Ongoing)

Additional Information

Hobbies: eSports, Exploring new places

Strengths: Effective team player, strong logical thinking
